EDUCATION

Artificial Intelligence and Data Science - Bachelor of Technology,
Thakur College of Engineering and Technology, **CGPI - 9.71**

May 2020 - Jun 2024 (Expected)

EXPERIENCE

Freelancing

Full Stack Developer

Feb 2023 - Current

Remote

- Built an E-Commerce web application for 6500+ Electronic products [[Website link](#)]. An Admin Panel has also been developed, allowing for easy modification of product data and sales data visualization.
- Created more than 15 different pages in this application using Techstack: ReactJS, NodeJS, ExpressJS, NextJS, MongoDB, and Sass.

ARCON Tech Solutions Pvt Ltd.

Software Developer Intern

Jun 2023 - Aug 2023

Andheri East, Mumbai, India

- Worked on one of the solutions of ARCON to implement log statements at strategic points in the code, utilizing appropriate log levels, and logging library i.e. log4net. Designed detailed flowcharts to visually represent the logic and execution paths of complex code modules or algorithms.
- Debugged the C# code consists of over 3000 lines.

PROJECTS

Medicall [[Code](#)] [[Website](#)] - **ReactJS, MongoDB, Python, and Flask**

A web application implemented during the GFG Solving for India Hackathon'23 (Regionalists)

- A comprehensive web application that connects patients with the right doctors and helps in finding the perfect doctor, scheduling appointments, and accessing prescriptions.
- It offers over 3 healthcare services such as live video consultations, symptom-checking, a pharmacy store for medicine purchases, and an additional facility for paying conveniently using the MediCall wallet, rechargeable via secure payments.

Sum-Up [[Code](#)] - **ReactJS, MongoDB, Python, Django, and Chrome Developers**

A web application built during Mastek's Deepblue Hackathon'23 (Semifinalists)

- A web application that simplifies summarizing team meetings using machine learning models in just 4-5 mins.
- An extension has been developed to provide additional features such as live transcription and export transcripts. The application allows users to store previous summaries and share them with others.

TECHNICAL SKILLS

Web Development

HTML, CSS, Javascript, Typescript, ReactJS, NodeJS, NextJS, Sass

Android Development

React Native

Other Languages

Python, C++, MongoDB

Developer tools

Git, VS Code, PyCharm, Android Studio

ACHIEVEMENTS

- Solved over 1300 DSA problems across various platforms
- Solved 850+ problems and Knight at Leetcode (1900+ rating) [[Profile](#)]
- 3 star at Codechef (1750+ rating) [[Profile](#)]
- 1000+ coding score at GeeksForGeeks [[Profile](#)]
