SUMMARY

Backend-focused Product Engineer with 1+ year of experience building and optimizing scalable fintech systems. Hands-on expertise with REST APIs, database optimization, distributed workflows, and AI/LLM-powered Agents, along with end-to-end ownership of production services in high-traffic environments.

EXPERIENCE

Juspay Technologies

Jul 2024 – Present

Product Engineer - I (Backend & AI Systems)

Bengaluru, India

- Designed and built an **LLM-powered Gateway** for lender integrations, orchestrating multi-step **AI agent workflows** for structured code generation, schema mapping, and automated validation/compilation of API integrations, reducing turnaround time from **2 days to 2 hours**.
- Built and scaled backend systems for the **Loan Marketplace platform** and **Credit Line Management system**, leading **Lender Gateway integrations** and developing **REST APIs**, contributing to **over 35% revenue growth**.
- Improved system performance and reliability by optimizing **PostgreSQL queries**, indexes, and **KV store access patterns**, reducing database load by over **40%**.
- Owned and maintained a **core backend service** responsible for tracking loan lifecycle events, settlements, and end-to-end process states, ensuring **data consistency** and operational visibility.
- Participated in **Infosec audits**, ensuring compliance with security and operational standards.

Freelancing

Feb 2023 – May 2023

Full Stack Developer

Remote

- Designed, developed, and deployed a **production-grade e-commerce platform** managing a catalog of **6,500+ products**, along with a custom-built **Admin Panel**.
- Implemented **backend APIs**, inventory management, and order processing with **real-time analytics**, achieving **low-millisecond response times** for read-heavy endpoints.

PROJECTS

UniMoney – Personal Finance Manager

React Native, Node.js, MongoDB

May 2024

- Built a cross-platform mobile app for **automated personal finance management**.
- Ranked **1st among 70+ teams** in the Mind's Eye Competition for innovation and overall product execution.

SKILLS

Languages & Frameworks: Haskell, Python, Node.js, C++, React.js

Databases & Storage: PostgreSQL, Redis, MongoDB

Systems & Tools: Grafana, Kibana, Git, Linux

Core Competencies: Data Structures & Algorithms, System Design, LLM Systems

ACHIEVEMENTS

- Knight** on LeetCode with a rating of **2000+**; solved **2200+ DSA problems** across multiple competitive programming platforms. [Profile]

EDUCATION

B.Tech in Artificial Intelligence and Data Science

May 2020 – Jun 2024

Thakur College of Engineering and Technology, **CGPI: 9.73**

Mumbai, India
